## Customer Defect (3)

Prevented that time zone from being used to shift dates (no time component) forwards or backwards by time zone offset when reading dates from messages.

[[RENO-18094](#), [CLONE \(4.13.0\) - Wrong issue date in M1 on the first day of summertime](#)]

Exception when forwarding locally unknown stopped items in PLL has been prevented and situation handled properly by ensuring the forwarding of PLL items stopped within the retention period (90 days).

[[RENO-18116](#), [CLONE \(4.13.0\) - NullRefException when signing/sending M25.1](#)]

"Not in Rf" items on the LIB that are no longer a part of PLL are no longer filtered out of the LIB list, only AF list.

[[RENO-18117](#), [Not in RF item erroneously filtered out of LIB list](#)]
