

# eResept 2.12.6 (#8430)

## Release Notes

14.11.2013

## No component defined

---

Fixed an error in patient data export when a resept contains information about the instituting organization but no organization name.

[ RENO-6831 ]

Defect fixed that allowed non-template-admins to create organizational protocols through the protocol search screen.

[ RENO-6875 ]

Bestanddelers were in some cases included in preparation prescriptions in version 2.12.5. This has now been fixed and e-resept for Legemiddelblanding should not contain bestanddeler in 2.12.6.

[ RENO-6877 ]

Defect fixed which prevented template admins from deleting any protocols via the protocol search screen.

[ RENO-6898 ]
