eResept 2.3.102 (#4724)

Release Notes

4.5.2012

No component defined

- Error fixed in interaction checking mechanism that would cause faults when interaction checking on preparations with free text medications without an ATC code.

  [RENO-3832, RENO-3840]

- When the FM main window opens, the title of the main window is logged into the Windows registry. It is logged into a string value called WindowTitle in the key HKEY_CURRENT_USER\Software \Theriak\eResept Forskrivningsmodul\Client.

  [RENO-3844]
