

Forskrivningsmodulen (e-resept) 3.4.13 (#10635)

Release Notes

26.9.2014

No component defined

Ekspederbare resepter that have been renewed (or linked behind a local resept) are shown in "Andre forskrivninger". After being recalled, those resepter would show up in the LIB as recalled until the patient was closed and opened again. This has been fixed and those resepter now disappear after being successfully recalled.

[RENO-9101]
