

Forskrivningsmodulen (e-resept)

3.4.2 (#10073)

Release Notes

20.6.2014

No component defined

Fix resept disappearing from LIB after been recalled but not separated.

[RENO-8281]

Renamed "Vis komplett LIB" checkbox in the "Knytt til LIB forskrivning" screen to "Utvidet visning".

[RENO-8283]

Fix when linking a papirresept to a local prescription via samstemming:

The problem occurred when linking a papirresept to a local reg-i-lib and using the local prescription as master. In that case the prescription was being sent in the next M25.1 as an eRp.

[RENO-8285]

When duplicate respet ids come in via M25 messages duplicate resept ids are shown is samstememing with an exclamation mark. If doctor is LIBansvarlig they will be sent in teh next M25.1message with a comment from the doctor stating that the medication should not be included in the LIB.,

[RENO-8286]

Fix when undoing handled prescriptions after accepting pharmacy proposals.

[RENO-8288]

Changed radio button captions in the "Knytt til LIB forskrivning" screen from "Vis informasjon fra lokal oppføring i LIB" and "Vis informasjon fra importert oppføring i LIB" into "Behold informasjon fra lokal oppføring i LIB" and "Behold informasjon fra importert oppføring i LIB".

[RENO-8289]
