

Forskrivningsmodulen (e-resept) 3.4.7 (#10371)

Release Notes

20.8.2014

No component defined

When pharmacy is requesting to seponate a prescription and the local prescription is already stopped, a positive answer to the seponate question is sent on the next M25.1 message.

[RENO-8894]

Terminology fixed in inbox notifications.

Short form of unit descriptions used in total prescription amount information in the prescription screen.

[RENO-8901]

It is not longer possible to edit dose unit when creating structured (or advanced structured) dosing.
