

Forskrivningsmodulen (e-resept) 3.11.2 RC1 (#15587)

Release Notes

9.11.2017

Customer Feature

When a patient is identified by an ID other than XXX-id, the XXX-id is no longer removed from the patient when the patient information is updated.

[RENO-13446 (erSak:13643), Resolved, (erSak:13643) As the FM I do not want to remove an XXX-id from a patient when the EPJ API is called without XXX-id]
