

Forskrivningsmodulen (e-resept) 3.4.12 (#10624)

Release Notes

24.9.2014

No component defined

Allow recall for Ekspederbar resepts in Andre Forskrivninger.

[RENO-9075]

Fixed problem when a recall from Andre Forskrivninger would should up in the LIB. This would happen when the prescription was previously linked to a local kur prescription.

[RENO-9089]

All lines in LIB are blue and italic if there is multidose user action pending for the prescription.

[RENO-9090]
