Forskrivningsmodulen (e-resept) 3.4.14 (10700)

Release Notes

3.10.2014

No component defined

In prescription view, stop date should now update properly when entering relative stop dates into structured dosing grid, when dosing period has dosing.
[RENO-9105]

When an M25.1 is nacked by RF due to a RefToParent error, the FM will generate a friendly notification telling the user that unseen LIB-messages are in RF and that the user needs to perform an RF lookup before sending in a new LIB-message.
[RENO-9107]

If we have a LIB-item that has been sent in M25.1 (or M25.2) that is renewed and during renewal the resept is locked the lib item is sent in the M25.1 with a reference to the old resept. Otherwise no locked prescriptions are sent in M25.1 messages.
[RENO-9111]

Fixed a bug that prevented selecting NIB/FIB items from RF
[RENO-9140]

Fix defect for prescriptions showing up in the lib after recalling from "Andre Forskrivninger"
[RENO-9141]

Fix bug when undoing a seponated prescription with pending recall.
[RENO-9147]

Fix status for prescription with pending M5 in "Andre Forskrivninger" after recalling another prescription from lib.
[RENO-9155]
