# Forskrivningsmodulen (e-resept) 3.4.21 (#11261)

## Release Notes

5.1.2015

## No component defined

Fixed the Patient/Country and Patient/County in outgoing MsgHead messages. The DN attribute was missing from these elements.

[ RENO-9590 ]

When processing user information received in the SkrivBrukerInfo EPJ API method, empty user information items such as address and telecom addresses are now ignored by FM. Any such items already existing in the FM database are not included in outgoing messages (in the MsgHead/Sender element)
