

# Forskrivningsmodulen (e-resept) 3.4.23 (#11438)

Release Notes

4.2.2015

## No component defined

---

Fix undo after rejecting an outdated fest prescription import with assistant.

[ RENO-9682 ]

Fixed indexing of SLV varslinger from FEST v2.4.

The defect fixed prevented FEST updates in FM versions 3.4.18-3.4.22 if an SLV varsling from FEST version 2.4 existed in the database which pointed to a legemiddelpakning which no longer existed in FEST 2.5.

[ RENO-9683 ]

Fixed an error that occurred when doing the first FEST update on a new FM database.

[ RENO-9686 ]

Performance improvements merged from version 3.5.2

[ RENO-9714 ]

To speed up the generation of M25.1 messages, now delivery messages are not loaded in that process.

[ RENO-9731 ]

Users receive a what's new notification in their inbox for version 3.4.23.

[ RENO-9736 ]
