

Forskrivningsmodulen (e-resept) 3.5.5 (#11996)

Release Notes

19.8.2015

No component defined

When renewing a prescription (non AK prescription) as an AK prescription, the previous one should not appear as recalled as it has been stopped.

[RENO-9891]

Database updated to handle FEST items with more active ingredients.

[RENO-10117]

The FM should no longer skip processing a second m25.2 when receiving two m25.2 messages in a row, and the "lib-meldinger" tab should show both m25.2 messages.

[RENO-10165]

In medication search the FM will no longer crash when "Felleskatalogen" is opened for a medication with only a single word name.

[RENO-10174]

Mini-dosett printout shows more than one line, when necessary, for CAVE.

[RENO-10175]

Dosett report should now be correct for advanced structured dosing with interval days

[RENO-10176]

When sending m2s, negative apprec will yield a Feiled status of application.

[RENO-10189]
