

# Forskrivningsmodulen (e-resept) 3.6.2 (#12750)

Release Notes

22.1.2016

## No component defined

---

Defect fixed which allowed jordmødre and helsesøstre to send resepter for drugs without MT.

[ RENO-10584 ]

Fixed defect which could cause forskriver in the prescription screen to be initialized to a user who did not have privileged to issue resepter for the selected drug.

[ RENO-10773 ]

Defect fixed which allowed user to omit the refusjonskode for H-resept if refusjonshjemmel 4 was selected before H.

[ RENO-10788 ]

G02B added to the list of ATC codes that jordmødre and helsesøstre can issue resepter for.

[ RENO-10874 ]

Reimburshementcodes from ICD-10 are now included in H-resepter.

[ RENO-10875 ]
