

Forskrivningsmodulen (e-resept) 3.7.0 RC4 (#13660)

Release Notes

5.9.2016

No component defined

-  Improved message in the confirmation dialog box when doctors are rejecting a draft seponering in samstemming.
[RENO-11762]
-  When opening the patient information dialog or the "Register RF lookup consent" for a patient and the RF lookup consent is already given, but with no information on who gave the consent, the FM no longer produces an error. This was happening for patients who had their RF lookup consent registered before the new consent registration model was introduced.
[RENO-11822]
