Forskrivningsmodulen (e-resept) 3.8.0 RC2 (#13915)

Release Notes

8.11.2016

Customer Feature

Changes in the HNT kurve prinout:
- Removed Skannes til DocuLive, kap F1» text at the bottom of the pages
- Admission date/year is now be placed under the text «Innlagt dato/år», instead of below the «Innleggelse» field.
- Changed "Vesp" to "Kveld" in the fields on the right side of "Resp frekv.", "SaO2 %" and "O2 L/min"
- Values for temperature (Temp) and pulse/bloodpressure (Puls/BT) are now aligned with the lines on the right such that temp of "37,5" and BT of "100" is aligned with the fat horizontal line.

[RENO-11872, Resolved, Changes to HNT kurve]

Customer Defect

Bugs when converting in epj api to name space version 2013-03-12, missing Id and extra elements have been fixed, draft prescriptions are also filtered out when converting "Svar" documents from version 2014-05-02 to 2014-01-14. Stop information is removed from stop drafts.

[RENO-11999, Resolved, CLONE (3.7 RC8) - LesVarerIBruk returns invalid XML in schema version 2013-03-12]

Fixed matching between locally received M8 (but not handled by a doctor) and M9.6 prescription.

[RENO-11975, Resolved, Loose resept which is not part of the local LIB is shown as being part of the local LIB in samstemming]

Fixed automatic RF lookup for patients with only DOB but with known referansenummer.

[RENO-11970, Resolved, RF-lookup is not automatically done for patients with only DOB]

Fixed gender property when generating MsgHead for a registered doctor with FNR and no gender.

[RENO-11942, Resolved, FM does not parse out the gender when a resept is sent "i legens navn"]

In "samstemming" when matching prescriptions which have a "Forholdsregel ved inntak text" added to dssn, the equal sign is now shown, and the dssn text on local and remote items should match as well.

[RENO-11940, Resolved, Samstemming: prescription with "Forholdsregel ved inntak" is correctly matched but without an "="-sign]

Defect

The proper user is now logged in when calling the Epj Api methods via Epj Api web service.

[RENO-11929, Resolved, Some API calls in the webservice test client need a bit of attention]

When Epj Api web service now rejects queries form other computers than web service host if configured that way.

[RENO-11926, Resolved, The parameter for allowing other computers to access using it EPJ API webservice is failing]
