

Forskrivningsmodulen (e-resept) 4.0.0 RC4

Release Notes

9.11.2017

Feature

Kjernejournal (KJ) is now a new source value in the label below the resept status in samstemming
[RENO-13338, Resolved, As a user, I want to see in samstemming if a prescription was received from KJ]

In samstemming, it is now possible to link deliveries for paper prescriptions, (received in an M8 message) to a local LIB item. These can not be linked to e-resepts, neither from samstemming or andre forskrivninger
[RENO-13330, Resolved, As a samstemming user, I want to link paper prescription deliveries]

Deliveries for paper prescriptions, received in an M8 message are now shown in the Samstemming window. They can then be imported from there into the patient's local LIB.
[RENO-13329, Resolved, As a samstemming user, I want to import paper prescription deliveries]

When doing KJ lookup the FM will process incoming deliveries (M8.1) if the delivery hasn't been processed before.
[RENO-13327, Resolved, As a user, I want to see delivery information received from the KJ]

In PLO installation nurses can accept / reject suggestions which do not require a recall.
[RENO-13295, Testing, As a nurse in a PLO, I want to accept some drafts]

Customer Defect

LesPasientStatus should not fail, the system is taking care of all types of identity
[RENO-13676 (Bug 145543), Resolved, VS: Bug 145543: Reåpnet: LesPasientStatus returnerer "KreverOppmerksomhet = false" selv om Legemiddelvarsling i FM logg-en returnerer true på legemiddelvarsling]

Fixed missing double medication warning in samstemming for unmatched external items
[RENO-13675 (Bug 147002), Resolved, Bug 147002: Double medication warning is not shown on external item in samstemming]

FM no longer sends prescription type as Eresept in a new M25.1 when MD-pharmacy sends it as Papirresept
[RENO-13660 (146733), Resolved, Bug 146733: FM sends papirresept () received and included from MD-pharmacy as]

Fixed missing interaction information in samstemming for unmatched external items
[RENO-13678 (Bug 147050), In review, Bug 147050: Interaction warning not shown on external item in samstemming]
