

# Forskrivningsmodulen (e-resept) 4.0.1 (#15961)

Release Notes

15.1.2018

## Customer Defect

---

Not in RF prescriptions in AF no longer block the sending of messages on the signing queue.

[ RENO-13971 (Bug 156864), Resolved, Bug 156864: LIB-ansvarlig has chosen "Ikke inkluder" in AF for an e-resept that is no longer in RF and still gets a notification that AF must be cleared when trying to send M25.1 ]

M8 in AF no longer prevents sending a new M25.1 message

[ RENO-13948 (erSak:14244), Resolved, (erSak:14244) M25.1 cannot be sent even though AF is empty ]

## Defect

---

Items from Andre Forskrivninger (AF) are no longer included in the dosett printouts. It is no longer possible to printout dosett sheets while there are unhandled items in AF.

[ RENO-13741, Resolved, External items are included in dosett labels ]
