## Customer Defect (4)

---

Rejecting recall drafts for installations that do not need accepting drafts should no longer throw an error.

[RENO-17543, [Error when doctor selects to accept a recall draft from a nurse for an external item in samstemming](#)]

Fixed an issue in samstemming where the LIB header was sometimes shown in the incorrect place

[RENO-17554, [The column headers in samstemming sometimes "moves"when using the "remove local LIB" function](#)]

If a user renews an "ekspederbar" item to a registration then undoing the pending recall item that can show up in AF grid yields the same results as undoing the renewed registration.

[RENO-17564, [Undo of recall when renewing eRp to Reg does not restore the eRp in LIB](#)]

making sure canUndo is set to false for head of chain prescriptions when we send an M5 for the previous prescription in the chain

[RENO-17567, [Undo-button available after M5 is sent](#)]

## Defect (1)

---

Adding a green frame to items when local item is updated using "Replace local LIB with PLL"

[RENO-17566, [Green frame not shown when local item is updated using "Replace local LIB with PLL"](#)]
