Customer Defect (4)

FM handles external renewals better for "samstemming" window.

[RENO-17945, CLONE (4.13) - Locally recalled and externally renewed PLL element shown as history element with recall option]

An older defect could result in a deleted item being included in a PLL message as stopped. These items, if present, would constantly show up in AF grid, here we've taken steps to eliminate that.

[RENO-17946, Removed local loose items shown in AF after replacing local LIB with PLL]

Refresh issue for item in AF grid when item is no longer in RF have been resolved.

[RENO-17973, NotinRF item shown in AF as in RF]

A renewed and stopped prescription should now correctly update local stop for the previous prescription when it arrives from PLL.

[RENO-17991, No automatic stop or update icon for externally renewed and then stopped PLL item]
