Customer Defect (4)

Made sure that LesVarerIBruk with a date range or a single date does not return previous prescriptions that were renewed outside of date(s).

[RENO-18252, Item that is not in today's LIB shown in LesVarerIBruk - VibDato output for today]

[RENO-18256, Stop info for treatments with structured dosing missing some info in LesVarerIBruk for external inst]

When doing "replace lib" in "samstemming" sometimes the FM would return an error for items that have FEST conditions. This has now been fixed.

[RENO-18258, "Feil ved fjerning av lokal legemiddelliste" -error – hard to reproduce]

Fixed strange situation after "undo linking/update" in samstemming.

[RENO-18259, Not possible to update local PLL item when undo has been used in samstemming for items externally renewed by non pll doctor]

Defect (1)

[RENO-18257, FM is not handling well when receiving two treatments in the PLL that both match the local item]
