

# Forskrivningsmodulen (e-resept) 4.9.7 RC2 (#19306),

## Release Notes

23.3.2022

## Customer Feature

---

A user can use the "sammstemming" actions that replace the whole lib, if signing queue is empty or only contains pending PLL messages.

[ RENO-17208, Resolved, CLONE (4.11) - PLL doctor is not able to "Erstatt lokal LIB med PLL" when nurse has added item to the LIB ]

## Customer Defect

---

Whole lib operations are now available regardless of PLL pending status

[ RENO-17206, Resolved, Doctor not able to replace local LIB with PLL ]
