4.9.8 (#19462)

Release Notes

11.8.2022

Customer Feature

When renewing an "e-resept" to a registration the recall message for the "e-resept" is sent out with "Årsak = Annen" and no "new resept id"

[RENO-17370, Resolved, CLONE (4.11) - As FM, I should send recall reason "Annen" in M5 when renewing eRp to Reg]

Customer Defect

When importing a treatment that has previously been removed by whole LIB operation, the import should now work properly by undoing the removed and link the imported prescription as head of history chain.

[RENO-17356, Resolved, Feil med PLL]

Defect

Allowed deleted items that have been removed in "empty lib" operation to be set to "Not In Rf" state when they no longer show up in an RF query reply.

[RENO-17390, Resolved, Items that have been removed in whole lib operations are not set to "not in RF" state in RF Query processing]
