

Forskrivningsmodulen (e-resept) 4.6.0 RC3 (#17572)

Release Notes

23.8.2019

Feature

During discharge samstemming, clicking the Add button on the matched RF prescription for an updated resept, a new row (treatment) will be created for the incoming prescription from discharge. The new row will be unmatched and the user is required to handle it before closing samstemming.

[RENO-15362, Resolved, As a doctor i want to handle external items when matched with Meona items in discharge samstemming]

Customer Defect

Fixed FM not accepting a new changed file from Meona.

[RENO-15504 (207061), Resolved, VS: 207061 - FM does not accept a new changed file from Meona when FM already has received one from Meona without opening FM inbetween those two files.]

Items stopped in Meona "samstemming" that are only local, i.e. do not have an RF match, are now correctly shown as handled.

[RENO-15499 (206823), Resolved, Stopping a Meona item in discharge samstemming leaves the item with a "yellow triangle" warning]

The FM will not send out more than one personal identification number per patient.

[RENO-15491 (206515), Resolved, RF rejects messages after the patient ID has been updated in FM]

Fixed error when cleaning up Helseld failed client registrations

[RENO-15421, Resolved, Cleaning up Helseld client registrations is not working]

Fixed browser freezing errors when performing Helseld login

[RENO-15393, Resolved, No result after PIN code to KJ lookup for Doctor]

Magistrelle Prescriptions in the FM allow longer package size units than before to prevent db error when prescribing.

[RENO-15370 (204703), Resolved, Cannot prescribe a preparation when using FEST with updated kodeverk for package size units]

Defect

Fixed update action no longer appearing on matched incoming AK prescriptions

[RENO-15432, Resolved, Impossible to update a local AK prescription in samstemming with a newer incoming AK prescription]

Fixed tool tip warning error when changing lifetime on resepts for fetotoxic drugs to exactly one year.

[RENO-15384, Resolved, Changing lifetime on resepts for fetotoxic drugs is not how it should be.]
