Forskrivningsmodulen (e-resept) 4.6.1 RC2 (#17887)

Release Notes

25.10.2019

Customer Feature

FM supports new data in coding systems 9090 and 7452

[RENO-15727, Resolved, CLONE (4.7) - As the FM, I want to support updated kodeverk 9090 and 7452]

Customer Defect

Undoing "resepts" created in "Meona" discharge samstemming should no longer cause freezing problems.

[RENO-15714 (211893), Resolved, VS: 211893 - FM freezes when doctor change a new Meona LIB item in FM discharge samstemming to eresept, then use undo button, change to local reg, use undo button and change again to eresept.]

Removed and Not in RF, items in Meona discharge samstemming are no longer shown on right hand side in "samstemming" window.

[RENO-15712, Resolved, VS: 211599 - BUG: Local reg (Kosttilskudd) is moved from left to right hand side in samstemming after completed discharge samstemming, a new transfer of Meona LIB and FM opened in Discharge samstemming the second time,]

Defect

Form column for "fritext" medications was too short for some of the values from the "kodeverk" which has now been fixed.

[RENO-15731, Resolved, Exception occurs when creating Freetext and the "Form" is long]
