Forskrivningsmodulen (e-resept) 4.7.1 RC1 (#18231)

Release Notes

21.4.2020

Customer Defect

For PLO installations when changing "Administrering" on lib item an error that could be raised, for no apparent reason, and shown in dialog has been fixed.

[RENO-16084 (Support 513259), Resolved, CLONE (4.5.1 to 4.7) - Error when updating "administrering" in the LIB row details view]

Fixed a problem where LesVarerIBruk would return an error when called with parameters VibStart/VibStop or VibDato and the patient has linked prescription in the local LIB. LesVarerIBruk should now be more stable when calling the method for a date range.

[RENO-16083 (Support 507932), Resolved, CLONE (4.5.1 to 4.7) - LesVarerIBruk returns an error for some patients]

Defect fixed for when importing prescriptions from AF grid, now the FM queries the RF automatically for any known deliveries for imported item.

[RENO-16082, Resolved, CLONE (4.8) - FM is not sending M9.7 when importing a resept to LIB]
