

Forskrivningsmodulen (e-resept) 4.7.2 RC1 (18433)

Release Notes

2.9.2020

Defect

Fixed a problem in the LesVarerIBruk EPJ API method when querying VIB for a time period. In some cases, an e-resept that was renewed within the given period would not be included in the results.

[RENO-16219, Resolved, CLONE (4.9) - Missing prescription from LesVarerIBruk results]

Database changes to fix performance issues.

[RENO-16218, Resolved, CLONE (4.8) - Add missing index for PatientIdents]
